SACHIN HARSH

Position Statement & Vision: I am seeking the National Executive Council VP role because I believe I can bring **fresh energy, stronger engagement, and new ideas to InspirASIA**N. We already have a **strong community,** and I see an opportunity to connect our chapters more closely, increase participation, and leverage the collective strength of our members nationally.

My vision is simple: connect chapters, engage more members, share what works, and make InspirASIAN stronger together.

Plans & Proposals: My key focus would be to **build stronger bridges** across InspirASIAN chapters and locations. My experience with Atlanta and Alpharetta has shown me the value of bringing locations together, sharing resources, and leveraging combined participation. I would like to expand that thinking nationally.

I would focus on:

1. **Chapter Connections:** Create stronger communication and collaboration across chapters so successful ideas and events can be shared and adapted.
2. **Member Engagement:** Use smaller meetings, informal touchpoints, and volunteer opportunities to keep members connected beyond major events.
3. **Membership Growth:** Increase awareness of InspirASIAN and make it easier for employees to understand how they can participate, contribute ideas, and volunteer.
4. **Collective Strength:** Find opportunities for chapters to collaborate and leverage our combined membership for broader initiatives.

InspirASIAN Experience:

Although I have been involved with InspirASIAN for less than two years, I have actively contributed and stepped up when needed:

- Stepped in to lead last year's Diwali celebration in Alpharetta when Rajeev had a personal emergency.
- Supported Diwali at the Lenox office and this year's Alpharetta Diwali celebration.
- Supported Lunar New Year across both locations and the Tea Party in Atlanta.
- Participated in the Dragon Boat Race, where our team won.

Leadership Experience:

- I am currently serving my third term as **HOA President,** which has given me hands-on experience in community leadership, communication, and bringing people together. One huge achievement has been that I created smaller task teams within neighborhood and recruited them myself to delegate different tasks.
- I also serve as **Team Manager** for my son's soccer team of 18 players. I helped coordinate the team's National Cup journey, including five days of activities in Denver, where the team ultimately won the National title.

Across these experiences, the common theme has been **bringing people together, creating engagement, and stepping up when something needs to get done.** That is the same energy and ownership I would bring to the National Executive Council VP role.
